

Ryan Jung

Columbus, Ohio

ry-jg.github.io

EDUCATION:

The Ohio State University

Columbus, Ohio

Bachelor of Science in Computer Science and Engineering

August 2023 – Present

Expected Graduation: December 2026

GPA: 3.98 (4.0 Scale)

- **Relevant Coursework:** Computer Game & Animation Techniques, Real-Time Rendering, Software Design Project, Data Structures & Algorithms, Operating Systems, Mobile Applications

TECHNICAL SKILLS:

- **Languages:** C#, Java, C/C++, Lua/Luau, Python, SQL, x86 Assembly
- **Software Architecture:** Object-Oriented Design (OOD), Event-Driven Architecture (Pub/Sub), Finite State Machines, Design Patterns (Observer, Command)
- **Tools & DevOps:** Git, Git LFS, Docker, Visual Studio, Linux/Bash, GitHub Projects / Agile Scrum

PROJECT EXPERIENCE:

Modular Event-Driven Architecture & DevOps Pipeline (C# / Unity) [In Progress]

Systems Integrator & Software Engineer

August 2026 – Present

- Architected a decoupled, event-driven Observer framework across gameplay, UI, and audio systems.
- Managed team DevOps for a 7-person studio, configuring Git LFS, branch protection rulesets, and UnityYAMLMerge conflict resolution.
- Refactored core architecture, consolidating fragmented spawner base classes and deduplicating pause controllers into unified, reusable systems.

Data-Driven 2D Simulation Engine & Procedural Generator (C# / MonoGame)

Gameplay Programmer & Scrum Master

January 2025 – April 2025

- Engineered a procedural dungeon generator parsing external CSV room templates, implementing lock-and-key progression graphs to ensure mathematically solvable dungeon layouts.
- Constructed a discrete 2D grid coordinate system, authoring directional room-scrolling viewport transitions and finite state machines for entity behaviors in pure C#.
- Facilitated Agile sprint ceremonies, sprint planning, task estimation, and peer code reviews for a five-person engineering team.

WORK EXPERIENCE:

IDEAS Game Dev Summer Camp

Columbus, Ohio

Game Development Lead Instructor

May 2026 – August 2026

- Guided weekly cohorts of ~20 students through an expedited game development lifecycle, transforming initial concepts into playable, published games on the Roblox platform.
- Designed two sets of technical curriculum teaching core programming logic, Lua/Luau scripting, and troubleshooting techniques to primary and middle school students.

Avon Lake City Schools District

Avon Lake, Ohio

Technology Department Intern

May 2025 – August 2025

- Provisioned and automated standardized Windows 10/11 image deployments across district endpoints.
- Diagnosed, resolved, and documented hardware and software issues across district endpoint devices.
